

Recreation Participant Safety Guidelines

General Guidelines

Participants who have symptoms consistent with COVID-19 (i.e. fever, cough, chills, muscle pain, or shortness of breath, sore throat, new loss of smell or taste) should stay home.

Participants who appear to have symptoms (as indicated above) upon arrival to a program or who become sick while on site should immediately separate themselves from others, notify a staff person or go home and contact their healthcare provider.

Participants should wash hands often with soap and water for at least 20 seconds, especially after touching surfaces, or after blowing nose, coughing, or sneezing. While hand washing is ideal, hand sanitizer is an acceptable substitute where time or location does not allow for handwashing.

Face coverings are encouraged* in programs where social distancing is not possible, or when in an enclosed area or building.

**Programs taking place in facilities other than Pewaukee Parks & Recreation locations may have their own safety policies and guidelines. Program participants must adhere to these guidelines while participating at these locations.*

In the case of a Positive COVID diagnosis:

The Parks & Recreation Department should be notified immediately if a participant is presumed to have COVID-19 or tests positive for COVID-19.

In both of these cases, the participant may return to the recreation program ONLY when he/she meets the following criteria:

- It has been at least 10 days since symptoms first appeared **and**
- 24 hours with no fever without the use of fever-reducing medications **and**
- Other symptoms of COVID-19 are improving.

If a participant tests positive for COVID-19, any participants or other staff members who have had contact with that participant for the past 14 days will be notified they have come into contact with someone who has since tested positive and those members will be reminded to self-monitor for symptoms. Names of the individual who tests positive CANNOT be shared.

We appreciate your cooperation and assistance in keeping you, other participants, and our community safe.
